

# THAM WENG HUNG

## CAREER SUMMARY

Mechanical/Project Engineer with 4+ years across railway infrastructure, product development, and technical sales. Currently commissioning infrastructure technologies for Hollysys (Asia Pacific), with a proven track record of achieving quantifiable outcomes, such as 20% faster sales conversions, 40% fewer production failures, and 30% revenue increase. Strong technical foundation in mechatronics, CAD and cross-functional project delivery

## EXPERIENCE

### Hollysys (Asia Pacific) Pte. Ltd.

Nov 2025 - Present

#### Project Engineer

- Oversee the installation, testing, and commissioning of infrastructure and electrical systems on-site, including equipment installation, cable laying, terminations, and containment, in order to meet project milestones.
- Manage interfaces, reduce risks, and promote schedule adherence by coordinating diverse teams, civil contractors, and subcontractors.
- To ensure a safe handover, create method statements, risk assessments, as-built drawings, and test reports. Oversee system testing, troubleshooting, and defect correction.
- Assure adherence to site safety procedures, railway and infrastructure standards, and technical assistance for client inquiries, stakeholder reporting, and progress tracking.

### Petracarbon Pte. Ltd.

Feb 2023 - Oct 2025

#### Product Engineer & Sales Support

- Oversaw the complete development and introduction of gearbox and air motor products, increasing product reliability by 15% through focused design improvements and testing procedures.
- Contributed to a 30% increase in revenue and a 95% customer retention rate by offering technical sales support to B2B clients and sales teams.
- Provided product demos and application troubleshooting, which resulted in a 20% improvement in sales conversion rates.
- Streamlined the delivery and bidding procedures to save lead times by 20% and production mistakes by 30%.

### Metalex Engineering Pte. Ltd.

Oct 2021 - Jan 2023

#### Drafter cum Machine Operator

- Reduced production errors by 40% by producing technical documentation and high-precision CAD designs.
- CNC equipment (laser/plasma cutters, bending and rolling machines) was programmed and run; technical drawings were translated to CNC programs to increase production speed by 35%.
- Worked in conjunction with production teams to achieve goals, uphold quality standards, and maximise workflow effectiveness.

### National Service

Aug 2019 - Aug 2021

Infantry, 6SIR

## CONTACT

## EDUCATION

### Bachelor of Engineering in Mechanical Engineering

RMIT University  
2023 - 2025

### Diploma in Mechatronics & Robotics Engineering

Singapore Polytechnic  
2016 - 2019

### Higher Nitec in Mechatronics Engineering

ITE College Central  
2014 - 2016

## SKILLS

- Project Coordination & Site Supervision
- Infrastructure Installation & Commissioning
- CAD Design & Technical Documentation
  - (AutoCAD/SolidWorks)
- CNC Programming & Operation
- Cross-functional Team Collaboration
- Technical Sales & B2B Support
- Quality Assurance & Process Improvement
- Time Management
- Mechatronics & Electromechanical Systems
